MIKADO

A striking design piece defined by its sleek, minimalist lines, that fits effortlessly into any space, thanks to its slim 23cm width.

With MIKADO, Radialight redefines the shape of electric heating. Measuring just 23 cm in width and 8 cm in depth, it gives life to a uniquely designed object, ideal for heating both living spaces - such as bedrooms and lounges - as well as your bathroom.

Our interiors are not defined by elegant shapes alone; they also follow colour trends that reflect our emotions. MIKADO is available in six different finishes, and upon request can be complemented with a practical set of matching towel rails and bathrobe hooks.

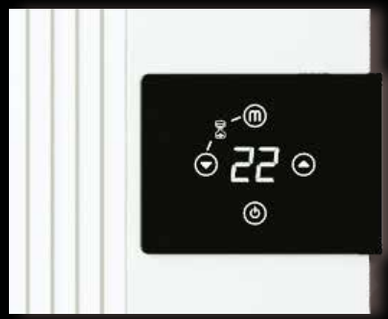

HEATING TECHNOLOGY

MIKADO incorporates Radialight's exclusive DUAL THERM heating technology. Thanks to a specially engineered heating element, it delivers warmth through both convection and radiant heat.

A flow of warm air is released from the side panels, quickly heating the room, while the front surface in extruded aluminum - featuring high thermal exchange and evenly heated - radiates a pleasant, enveloping sense of comfort.

ELECTRONIC CONTROLS

MIKADO is intelligent, because it decides how much heat is needed to reach the required temperature, avoiding a needless waste of energy. But it offers you so much more.

Multiple operating modes adapt to your lifestyle. You can set a consistent and comfortable temperature, or you can program the unit, saving money when you're not at home. If, instead, you want to heat when you want to and for as long as you want to, the timer function is your best choice.

TECHNICAL CHARACTERISTICS

- Moisture proof, powder coated metal structure with extruded aluminum front surface.
- Dual-Therm heating system: radiation for all-round comfort, and convection for quick, consistent and silent heating.
- Suitable as both main and accessory heating.
- Easy-to-use touch controls with LCD display.
- Electronic thermostat with automatic heat control, to avoid energy waste.
- Various operating modes: automatic, programmed, timer.
- Open-window alarm function.
- IP 24 protection against water spray: safe even in the wettest places.
- Available in 6 different colors
- Available pair of practical towel rails and bathrobe hooks to match the radiator (*)

(*) Accessory to be separately purchased

MIKADO

A band of warmth and color that shapes your bathroom.
Clean, essential lines allowing easy installation even in the most compact spaces.

Vertical fins shape an aluminum front panel that radiates heat with high thermal efficiency, while the convective airflow released from the side profiles ensures your bathroom warms up quickly.

Available in six different color options, featuring modern, on-trend tones with refined sandblasted finishes, it adapts effortlessly to a wide range of interior styles.

Elegant and discreet, MIKADO can be paired with a practical set of matching towel rails and bathrobe hooks.

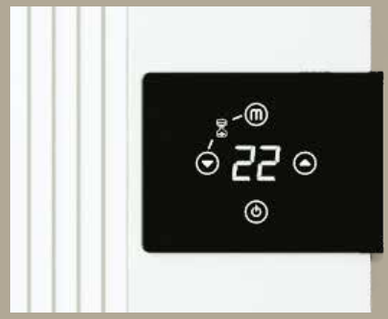

Heating Tecnology

MIKADO's advanced heating technology harnesses the excellent heat diffusion properties of its aluminum front panel, which emits radiant heat to deliver an immediate, pleasant, and enveloping warmth.

At the same time, the convective airflow engineered by RADIALIGHT to be released from the 2 side profiles, ensures rapid heat distribution , allowing the bathroom to warm up quickly and efficiently.
